EXPERIENCE

Eurofins IT Solutions India Pvt. Ltd - Software Engineer

AUG 2022 – SEP 2025

Project: Off Site Management (OSM)

- Engineered and enhanced server-side **REST APIs and microservices** using **C#, .NET Core/Framework, and MSSQL**, with a focus on scalable and efficient data processing, applying **Object-Oriented Programming (OOP)** principles for scalable and efficient data processing.
- Contributed to the modularization and architectural planning of backend systems by developing and maintaining **multiple microservices along with monolith service**.
- Developed and optimized an **Angular PWA** for offline sample collection using **Service Workers, IndexedDB, GPS**, and device features enhancing field operability on remote sites.
- Designed and implemented dedicated client application using **Angular + NgRx** for planners to efficiently plan operations and schedule events.
- Built reusable **Angular-based component library** for Form & Geo component controls.
- Optimized Sync and Parcels/Container modules, reducing execution times by 85%, improving user experience, speed & efficiency.
- Led Angular upgrades (v10 → v16), improving maintainability and performance.
- Established **CI/CD pipelines on Azure** for seamless deployments.
- Planned the application domain and architectural approach, conducted code reviews, provided mentoring.
- Collaborate with Business and Product Owners to analyze requirements and strategically plan the product roadmap.

Tools & Frameworks: Angular v5/v16, NgRx, PWA, TypeScript, Angular Material, Karma, .NET Framework/Core, Microservices, MSSQL Server, NUnit, Azure DevOps

SKILLS

Languages: C#, TypeScript/JavaScript, HTML/CSS3

Technologies/Libraries: Angular, .NET Framework/Core, Azure, SQL, Git, Grafana, Octopus Deploy

PERSONAL PROJECT HIGHLIGHTS

- **SEVA (Secure E-Voting Application):** Developed a decentralized e-voting platform on Ethereum with ReactJS, Solidity, and Web3.js, ensuring election transparency and security.
- **VisionEd:** Created an Android assistant app for visually impaired users, offering communication and safety features using Java.
- **SearchTap:** Built a child-safe search engine with Flask, TensorFlow, and Firebase, incorporating NLP keyword filtering to block inappropriate content.

EDUCATION

New Horizon College of Engineering
Bachelor's in Computer Science & Engineering

AUG 2018 - JUL 2022
Bangalore, India
